ABOUT ME

Designing digital business infrastructure: connecting CRM, databases, and communication channels (Telegram, Slack) into end-to-end automated pipelines. Leveraging a hybrid stack — agile low-code (n8n, Make) for fast integrations and Python/SQL for robust, scalable core logic.

Deploying applied AI where rigid rule-based scripts fall short and contextual intelligence is required: autonomous agents for sorting inbound leads and RAG-based search across internal knowledge bases. Backed by 8 years of engineering background, ensuring strict data validation, fault tolerance, and system stability.

KEY PROJECTS

AxonBot | Enterprise RAG for Corporate Knowledge Base

Stack: Python, Aiogram, n8n, Qdrant, GPT-4o, Docker

- **Solution:** Reduced manual document search across company guidelines from 20–30 min to 4.3 sec. Grounded AI answers across 88 Confluence SOPs with source citations and embedded diagrams.
- **Metrics:** 97% Benchmark Score (60+ automated test cases) | 4.3s avg response latency.

DocFlow Bot | CRM & Client Onboarding Automation

Stack: Python, Aiogram, FastAPI, SQLite, Telegraph API, Docker

- **Solution:** Autonomous Telegram service for top-of-funnel deal handling: Instant View previews via Telegraph with video verification, FSM validation, and multi-currency calculator (RUB/VND/USD).
- **Metrics:** -87% form errors | -80% manual inquiries | Zero race conditions.

WORK EXPERIENCE

DOGMA | Lead BIM Coordinator 2024 — 2026

Top-5 Real Estate Developer in Russia

- **Zero-to-one Process Launch:** Designed the architecture and technical specifications for Jira Service Desk implementation: task ticketing, incident triage SOPs, and R&D automation tracking for 100+ engineers with transparent SLA reporting.
- **AI & Product Ownership:** Built an internal RAG assistant prototype for SOPs; conducted 20+ CustDev interviews and designed UI/UX in Figma for internal tools (cutting onboarding time by 30%).

WE-ON Group | BIM Lead | Structural Engineering 2022 — 2024

Leading engineering consultancy focused on automation

- **Routine Automation:** Developed custom script suite (Python / Revit API), speeding up project parameter audits 20x (from 15 min to 45 sec). Championed Scrum and GTD workflows.

Severin Development | BIM Coordinator / Project Tech Lead 2020 — 2021

Engineering innovation hub and cradle of Signal ecosystem

- **74-story Moscow-City Tower:** Aligned LOD/LOI model requirements with executive stakeholders. Established Scan-to-BIM point cloud reconstruction pipeline.
- **R&D & Team Leadership:** Researched digital twin facility management models for post-commissioning operations. Conducted technical interviews and built the delivery team.
