TECHNICAL STACK

STRATEGY & AI

Scrum/GTD CustDev
RAG Systems Python
FastAPI

INFRA & INTEGRATIONS

n8n AmoCRM Meta API
Docker VPS/Linux Jira

AEC ENGINEERING

Revit Server Revit API
Dynamo Navisworks

ACHIEVEMENTS

Silver Medalist, All-Russian BIM Tech Competition (2020)
— *Elite industrial design expert.*

74-story Skyscraper: Led BIM coordination for a Moscow City megaproject, ensuring 100% digital twin integrity.

Systems & Infrastructure: Architected **Jira Service Desk** (170+ cases, **38% R&D**) and a **Notification Bot** for real-time sync.

AI & RAG Assistant: Developed a production-ready system for instant navigation through technical specifications.

ABOUT ME

I spent 8 years inside AEC megaprojects — from massive residential complexes to a 74-story business tower in Moscow City. I realized the biggest bottleneck is often not the software. It's the broken workflows around it.

Currently specializing in workflow architecture and available for high-impact project implementations or strategic consulting.

PROFESSIONAL EXPERIENCE

DOGMA | Senior BIM Coordinator

TOP-5 Residential Developer in Russia

2024 — 2026

- Systems Architecture**: Designed and implemented a BIM task management ecosystem in **Jira Service Desk** for 100+ engineers. **Technical Impact**: Architected 15+ automated transition rules and notification pipelines, closing 170+ cases with **38% specifically focused on high-complexity automation and R&D**. Established transparent SLA reporting via custom dashboards.
- AI & R&D**: Developed a production-ready **AI Assistant (RAG)** for instant navigation through internal technical specifications and corporate knowledge bases.
- Product Management**: Conducted 20+ CustDev interviews, translated user needs into technical specifications, and prototyped UI/UX interfaces in **Figma** for internal Revit plugins, resulting in 30% faster onboarding for new staff.

WE-ON Group | BIM Team Lead (Structures)

Leading engineering firm with deep automation focus

2022 — 2024

- Automation**: Developed an enterprise script suite (Python/Revit API) that accelerated project parameter population **by 20x** (from 15 minutes to 45 seconds).
- Workflow Engineering**: Implemented **GTD** and Scrum-lite methodologies, enabling the structural team to increase modeling throughput by 40% within 6 months.

Severin Development | BIM Coordinator

Innovation incubator & birthplace of the "Signal" ecosystem

2020 — 2021

- Complex Projects**: Led coordination for a comprehensive information model (AR, Structural, MEP) of a **74-story skyscraper** in Moscow City.
- R&D**: Developed workflows for **Scan-to-BIM** technology, using point clouds for real-time construction precision control.

MK3 Engineering | BIM Coordinator

Award-winning industrial & high-LOD design experts

2019 — 2020

- Recognition**: My industrial project won **2nd place in the All-Russian BIM Technology Competition 2020**.
- Quality**: Optimized clash detection algorithms, reducing documentation errors by 30%.
